

# LASH AFTERCARE

## WHAT YOU NEED TO KNOW:

### ALWAYS WASH YOUR LASH EXTENSIONS

You must always clean your lashes with your Nikki Beauty foam cleanser (\$15). Dirt, oils, sweat, bacteria, and makeup will buildup if you do not clean them. Washing your lash extensions will also improve retention, prevent infections, and bring the fluff back to life each time. Make sure to wash them as often as possible (especially if you have oily skin/are sweating). You wouldn't wash your hair with just water (or not wash it at all). Water alone is not antibacterial.

### NEVER PICK & PULL AT YOUR LASHES

Picking/pulling at your lash extensions can cause them to fall out prematurely and can rip out a natural lash. Your lashes last the longest when you leave them alone! Brush them daily to untangle any lashes out of place.

### KEEP UP WITH YOUR FILLS

Lash refills every 2-3 weeks are essential to keep your lashes looking your best. Like the hair on your head, your lashes shed daily. You lose about 1-5 lashes a day, you just don't realize it because your natural lashes are very fine and thin. At your fill ins, we remove all your outgrown lash extensions to place a new lash!

### AVOID DIRECT HEAT

Avoid direct heat like hot blow dryers, fire, & ovens. Heat near your lash extensions will make them frizzy and lose their curl! When drying your lashes use your blow dryer on cool setting or use my lash fan (\$10).

### NEVER USE OILS OR OIL-BASED PRODUCTS NEAR YOUR EYELIDS

Oil causes the adhesive to break down which makes the extensions fall out. Use an oil-free makeup remover and always remember to wash your lashes after using makeup remover.

**Your lashes are an investment so please treat them and take care of them as such**
